EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Sullivan on 6/13/07. The application has been amended as follows:

In claim 12, line 2, replace "alpha-lubricant" with "alpha-olefin".

This amendment corrects a typographical error. Isobutylene is not an alpha-lubricant. Indeed, the term "alpha" appears only in conjunction with "olefin" as in "alpha-olefin" in the instant specification. No new matter is added, as support for isobutylene as the alpha-olefin monomer is found in Examples 1-5 in Tables 1-2 on pages 23-24 of the specification, and page 15 lines 17-20 of the specification.

Reasons for Allowance

2. The rejections of claims 1-2, 5, and 7-9 in the office action mailed 3/8/07 have been withdrawn in light of applicant's cancellation of those claims in the amendment of 6/1/07.

3. Claims 10-12 are allowed for the reasons set forth in the office action mailed 3/8/07. The closest prior art, Harada, discloses an imidated copolymer of an alpha-olefin and a maleic anhydride, but only discloses an imidation ratio of 50%, and does not provide any teaching or suggestion to modify the imidation ratio to between 1 and 35%.

While polymers with imidation ratios of between 1 and 35% are known, they are not useful in the lubricant art and there would have been no motivation to combine them with Harada.
